THE COTTON MARKET YEsterday was of the Saturday completion, and little was done. Orders are few, but holders are indifferent about parting with good medium and super or grades at prosent prices, and the pables have no great show of those qualities. Low grades can be got on pretty invorable terms. An exporter took 250 bales at 71c after the close of the market. The New York Bulls zin, of Thursday, reported: "Spo's mot with a general demand, so far as it went, but there was an entire absence of spirit to the movement, and business again confined to small irregular parceis, as required on special, and as a rule, pressing orders only. Selections and amounts required have been obtained without difficulty, and appearances were weak enough to induce a reduction of 1-16c on quotations. For future delivery, the market was unretiled, with no very decided final variations on eset. At the opening the turn was downward, and matters looked a little heavy, with 1-32c at least lost, but suddenly a large operator came forward and bought August freely, which sent prices on the upward range again, the market closing steady at yesterday evening's figures on hear-by, and, in some cases, a fraction under on the late months. There was nothing new of a stimulating character, and so far as could be discovered, and the turn for the better seemed to be merely the result of the manipulation reported in our last, August undergoing a hammering until heavy, with 1-32c at least lost, but sud-August undergoing a hammering until a proper point was reached, and the shorts' then coming in and covering. The cotton exchange received the following dispatch from the New York Chronicle: "We had another favorable wesk for crops; there were showers almost everywhere, but generally very light and beneficial. Charleston had heavy thunderstorms, but they did not extend inland with severity. An unfavorable feature is that caterpiliars are reported, but no damage of importance is done, or likely, unless it becomes Shreveport states that the overflow did damage above the Red river raft rigion." The following from a London dispatch, showing the cause of the explosion on board the British war-ship Tounderer a few days ago, which resulted so diastrously to human life, shows that Johnny Bull has adopted the great American idea of allowing damphools to handle things they know nothing about: "A dispatch from Plymouth says yesterday there prevailed a pleasantly that a few days before the disastrous counteracting breezs, which made the trial-trip of the Thunderer, her boilers were tested by bydraulic pressure, maksafety and all other relief valves. It has been discovered that the wedges had never been removed. The communication valve was also closed, and no steam was able to escape even to the ergine.'

Erysipelas, Piles. Rheamarism, Erup - enses, Hillousness liver component, Dropsy, Tetter, Ta-more and sait sheam, Worms, Gont, Sear-sligt, as a Dinner Pill, and Purifying the flood, are the most congenial pargetive yet perfected. Their effe is abundantly show how much they exect all other Pilis. They are safe and pleasant to take, but powerful to cure. They purge out the fool humo sof the blood; they stimulate the sluggish or disordered organ into action; and they impart health and tone to the who's being. They eure not only the every day complaints of everybody, but formidable and dangerous diseases. Most satisful physicians, most emment elergymen, and our best citizens send certificates of cures performed and of great benefits they have derived from these Pilis. They are the safest and best physic for children, because yet perfected. Their effe is abundantly sho
